

TOGETHER FOR THE CLIMATE

Hi folks! What are you doing from
November 14th to 17th, 2024?

COP 29 (UN Conference of the Parties) will be held in Azerbaijan from November 11th to 22nd — literally in an oil state! We plan to **protest its inadequacy** in dealing with the raging climate crisis at this year's Climate Cop Out 2024.

Climate Cop Out is structured around the idea that **our protest is loudest when we take collaborative action** in a condensed period **during the global, yearly United Nations climate change conference.**

It's a shared project space for **workshops, community building, and knowledge and skills sharing** with plenty of collaborative opportunities including co-designing it how we want. We'd love to have you involved. Let us know your thoughts and ideas!

Diversity of tactics that don't harm living things is the most effective way to create social and political change — **if we act together, our disruption is amplified.** This allows all groups to **participate in their own way**, including empowering smaller, yet disaster-affected, groups to take effective action. We hope it becomes **a collaborative space of continent-wide networking and movement building**, ultimately creating an open political space for diverse activists to express themselves together.

LET'S COLLABORATE IN SYDNEY (GADIGAL LAND)!

COP 31 is planned to be held in Australia in 2026.

Let's be prepared to respond.

Get this event on the activist calendar!

LAST YEAR'S EVENTS

At the inaugural Climate Cop Out 2023 last year, a few Sydney and interstate **climate action groups collaborated** in a period of resistance.

There were workshops, panels, events, and a variety of actions such as **disruptive bike rides, rallies and targeted graffiti** in a bid to denounce COP's legitimacy and publicly call the conference what is: a cop-out. Governments are merely using the COP as a trade event for fossil fuels!

Check out the latest schedule for 2024!

HOW TO GET INVOLVED

Are you an **action planner**? A **facilitator**? A **cook**? A **street medic**? A **costume maker, artist or musician**? Want to **host a workshop**?

We have a great base at **Addison Road in Sydney**, and would be thrilled to fill it with climate action over 4 impactful days!

Check out the latest schedule (attached) and see if you have something to offer.

We currently **meet on Mondays 7pm online**.

In Love, Peace, CouRage and Resistance.
